

**a One physics step  $k$**  MotionControlLoop with the synthetic or Isaac backend (identical call order)

**b Multi-rate schedule**  $\Delta t = 5$  ms (200 Hz); control period  $2\Delta t$  (control\_decimation: 2); display every 4 steps (render\_interval: 4)

**c Mission phases of one run** configs/helix.yaml on the synthetic plant (actual output of this code)
